BAMBINI EARLY LEARNING CENTRES

TODDLER *2-3 years*

"The age of discovery"

Let the learning and exploring begin....

From the ages of 2 to 3 years, toddlers will continue to learn and develop a variety of skills and concepts that are important for their growth and development. At Bambini, we believe it is important to create an environment in which your toddler feels supported and safe to express themselves and their individuality. We believe it is important to encourage them to choose their own path of growth, whilst ensuring they meet all developmental milestones for their age group.

DEVELOPMENTAL MILESTONES

Motor Skills

Toddlers are introduced to fundamental academic concepts like shapes, colors, and counting. Through hands-on experiences, interactive play, and sensory exploration, toddlers develop a strong foundation in these concepts, paving the way for their future learning in school. Our holistic approach recognizes that early exposure to academic fundamentals, in a meaningful and engaging manner, cultivates their curiosity, critical thinking, and a lifelong love for learning.

Language Development

Toddlers thrive in an environment where they are immersed in language-rich experiences, refining their communication skills, and engaging in meaningful conversations. This can be done through play, storytelling, books, and imaginative puppet play, fostering their linguistic development and nurturing a love for language and expression.

Basic Academic Skills

Toddlers are provided with enriching experiences that facilitate the refinement of their fine motor skills through engaging in activities such as drawing, painting, and using scissors. Additionally, they actively strengthen their gross motor skills by participating in physical activities like running, jumping, and climbing. These hands-on encounters enable toddlers to explore their physical capabilities, fostering both their dexterity and their overall physical development in a supportive and empowering environment.

Creativity

Toddlers are provided with opportunities to participate in creative endeavors, such as singing, dancing, and engaging in imaginative play. These activities not only fuel their imagination and nurture their creativity but also encourage self-expression, fostering a deep sense of wonder and joy as they explore the world around them.

Independance

Toddlers are encouraged to further develop their independence by learning to dress themselves, use the bathroom autonomously and actively participate in daily tasks, fostering their sense of empowerment and self-sufficiency as they continue to explore and engage with their environment.

Cognitive Development

Toddlers are empowered to foster their problem-solving and critical thinking abilities, along with memory and attention skills. Through open-ended exploration, hands-on experiences, and thought-provoking activities, toddlers are encouraged to investigate, analyze, and find creative solutions to challenges. By nurturing their natural curiosity and providing opportunities for reflection and engagement, we aim to cultivate their cognitive development, fostering the growth of essential skills that promote lifelong learning and intellectual independence.

Social Skills

Toddlers are provided with opportunities to engage with peers and adults in a nurturing and collaborative environment. Through these interactions, toddlers learn valuable social skills such as sharing, turn-taking, and cooperation. Encouraged to express their thoughts and emotions, actively listen, and engage in group activities, toddlers develop a strong foundation in interpersonal communication, empathy, and building positive relationships, fostering their social competence and promoting a sense of community and belonging.

What can you expect for your Bambini Toddler?

They will be emersed in an Emergent Curriculum.

- Our curriculum encompasses intentional teaching of skills we know are necessary for your child's cognitive, social, and motor development, to ensure they are ready for their next steps in life.
- Our educators utilise observation, conversation, and reflective practices to create a learning environment for your children where they can focus on and explore their individual passions and interests.
- At Bambini, Children are viewed as being in charge of their learning and educators are facilitators who help the children make their desired learning happen.
- Children are impressively dynamic, and the space they learn in should reflect their reality. At Bambini, materials and learners coexist in a space conductive to development and growth.

They will be educated based on their individual interests and development.

- Our a holistic, play based, emergent curriculum creates a solid foundation for a child's learning journey.
- We recognise the important developmental stage of each individual child and thus create an environment which fosters this learning.
- We offer children a flexible routine with indoor/outdoor opportunities happening throughout the day, allowing the children to learn about the topics which interest them.
- Our educators build reciprocal and trusting relationships with the children, which assists children in their social and emotional development.

We focus on the social and emotional development of each child to ensure that all children's needs are met.

They will sleep safe and sound

- Our Educators have been trained in positive safe sleep practices, which means a better chance of sweet dreams for your child in a safe and nurturing environment.

Family Involvement

- We believe partnerships with families are extremely important in the children's learning journey.
- We respect parents as a child's first teacher and view them as a crucial part of the child's ever growing learning team.
- Parents at Bambini are always valued, respected, included and listened to.
- Through our Bambini App, Parents are able to view stories and photos throughout the day. They are also shared important information such as sleeping, feeding and nappy changing etc. Here we share also special moments, achievements, and your child's learning journey.

They will play, be guided, and supported by amazing educators.

- Bambini educators are seen as partners, advocates, and co-learners, facilitating, and supporting the children in their positive learning process.
- It is the role of Bambini educators to extend and deepen children's ideas and theories. Through careful observation, documentation, thoughtful questioning and reflection, the educators work in partnership with the children to negotiate curriculum, extend thinking and develop exploration.

They will be in an environment that will allow them to flourish and develop.
